

Introducing the Triple Width System

Each Triple Width System **TWS** shoe has 3 removable inserts, every time you remove an insert the shoe becomes 1 width wider. The platforms are designed specifically for the widest width. Every added insert takes up one width. This gives the fitter or patient the option to customize the fit of the shoe to accommodate swelling, pronation, certain deformities where one foot is wider or different in some way to the other foot. Triple Width System shoes are indicated with a **TWS** next to their name.

Aries

Aries **TWS**

- Triple Width System
- Reinforced Counter
- Achilles Tendon Support
- Breathable Leather / Mesh
- Thomas Heel
- 3/8" Extra Depth
- Seamless Construction
- Rocker Sole
